

## Manufacturing of clinical trial batches — precision and speed for your research

We would like to support you in the successful implementation of your clinical trials and offer a comprehensive range of services. As a GMP and FDA-certified company, we conform to the highest quality standards.

### Our service package for clinical studies

We offer support in areas of development, manufacturing, testing, QP batch release and distribution of clinical investigational medicinal products.

You get everything from a “single source”. We take care of the complete processing for your clinical trial.

- Manufacture of liquid and semi-solid dosage forms up to 100 kg batch size
- Manufacture of oral solid dosage forms up to 75 kg batch size
- Manufacture of innovative dosage forms such as micro- and nanosuspensions, nanoemulsions and nasal sprays
- Tailor-made primary, secondary and tertiary packaging incl. labelling
- Customised labelling incl. blinding / randomisation

- Development and packaging of individual patient kits
- Release and stability testing
- QP batch release
- GMP storage incl. cold storage
- Distribution under controlled conditions to clinical trial sites
- Procurement of comparators
- IMPD Writing
- Import / export and customs clearance

As reliable partner for leading global pharmaceutical and biotechnology companies we provide services for small and large molecule drugs.

We offer a service portfolio ranging from formulation development, analytical development and quality control, manufacturing of clinical batches and smaller market batches to pre-clinical development, pharmacovigilance and GxP services.
